

# SJF BREAST CENTRE OF EXCELLENCE

www.sjfbreastcentre.co.za

## FEMALE DOCTORS & ENTREPRENEURS

### ACHIEVED OVER THE LAST 4 YEARS

The SJF Breast Centre of Excellence comprises a dedicated multidisciplinary team committed to enhancing patient care through collaboration. Founded by young, compassionate, and entrepreneurial female doctors and located at Johannesburg Surgical Hospital, the team recognised the necessity for enhanced support for breast cancer patients, addressing not only management of breast cancer but also essential individual emotional support for each patient.

We believe in modern and more specialised breast cancer management and personalised treatment that involve the collaborative efforts of a wide variety of healthcare professionals.

The centre includes oncologists, dieticians, physiotherapists, occupational therapists, psychologists, social workers, and palliative care doctors. Together, we strive to provide comprehensive, holistic care to ensure the best possible outcomes for our patients.

### BREAST CANCER AWARENESS

In 2019, based on thorough research, we began our first breast cancer month campaign. Our focus is to make the journey of treatment to recovery easier. We create extensive awareness for Breast Cancer throughout the year, especially in October.

We handle things differently

## WE AIM TO...

**WALK** the breast cancer journey; from diagnosis to cure, hand-in-hand with our patient.

**PROVIDE** comfort, easing the emotional and physical outcomes for the patient.

**MAKE** care affordable to all patients with breast cancer.

**LESSEN THE PAIN** and suffering that comes with this heart-wrenching diagnosis
